

**SCOPE OF SERVICES
EARLY PRELIMINARY ENGINEERING AND DESIGN SERVICES**

US-12BR Bridge
JN 104152

Question 1: Is a presentation and technical proposal required as part of this proposal.

Answer 1: Presentation requirements will be at the discretion of the MDOT Project Manager after scoring of the proposals and may be requested from the top three (3) Consultants.

Question 2: In MDOT's view, what would the % effort be on the Environmental Assessment aspect and the Bridge Scoping aspect to the project?

Answer 2: Consultant will be responsible for technical aspects of the Environmental Assessment (EA). MDOT staff will prepare the EA document using technical information provided by the Consultant. Consultant will be responsible for performing the bridge study, preparing four (4) alternatives, performing hydraulic analysis, and completing scoping checklist from MDOT Scoping Manual.

Question 3: Is there existing information or existing plans available for review?

Answer 3: No additional information is available at this time.

Question 4: Under the Design Scope of Work, in the RFP, item 5 states that "MDOT Staff will perform analysis." Specifically what analysis will MDOT be performing?

Answer 4: MDOT staff will determine recommended alternative based on information provided by Consultant.
